Security

Some pages within the site will request credit/financial details for online transactions, e.g. our membership and donation forms, and the online shop section. Our site protects the security of your credit card information as it is transmitted to us by using the latest in Internet encryption technology - Secure Sockets Layers (SSL) - to scramble and encrypt your information.

You can make sure you are accessing our secure server before you submit financial information by looking at the lower left-hand corner of your browser. If you see an unbroken key or a closed lock (depending on your browser) then SSL is active. To double check for security, look at the URL or Location line of your browser. If you have accessed a secure server, the first characters of the address in that line should change from "http" to "https".
